END TO END DASHBOARD PROJECT IN EXCEL

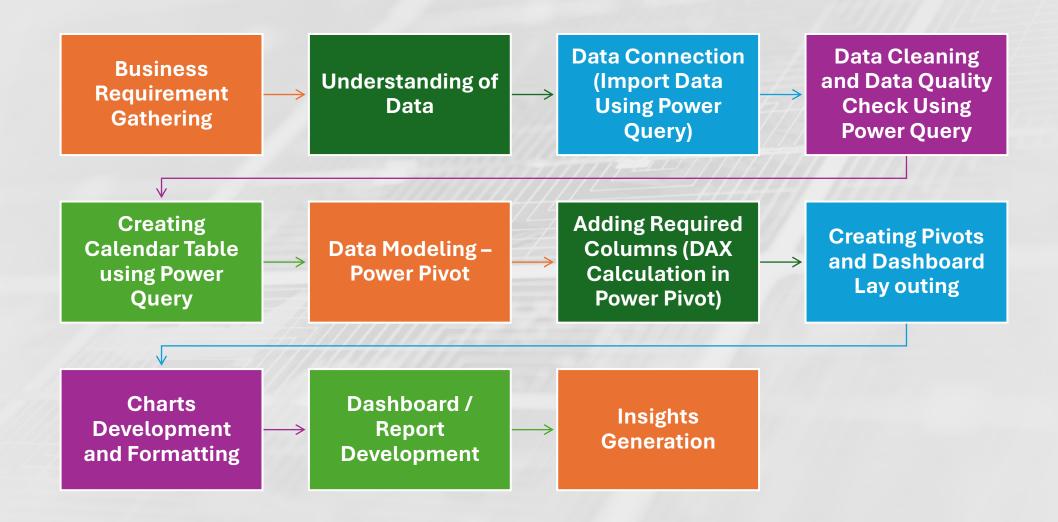

Project Steps

We need to create a Hospital Emergency Room Analysis
Dashboard in Power Bl to improve efficiency and
Provide useful insights. This dashboard will help
stakeholders monitor, analyze, and make better
decisions for managing patients and improving services.

KPI'S Requirement

Number of Patients:

Count the total number of patients visiting the ER each day. Show a daily trend with an area sparkline to spot patterns like busy days or seasonal trends.

Average Wait Time:

Find the average time patients wait to see a medical professional.

Use an area sparkline to track daily changes and highlight days with longer wait times that might need improvements.

Patient Satisfaction Score:

Check the average daily satisfaction score of patients to assess service quality.
Use an area sparkline to show trends, spot drops in satisfaction, and link them to busy times or challenges.

Charts to Create:

- •Patient Admission Status: Show how many patients were admitted vs. not admitted.
- Patient Age Distribution: Group patients by age.
- •Timeliness: Measure the percentage of patients seen within 30 minutes.
- •Gender Analysis: Display the number of patients by gender.
- •Department Referrals: Check which departments patients are referred to the most.

Calendar Table Formula

• = List.Dates(#date(2023,01,01),731,#duration(1,0,0,0))

DAX Formulas

DAX Formula for Age Group :

```
=IF([Patient Age]>=70,"70-79",IF([Patient Age]>=60,"60-69",IF([Patient Age]>=45,"45-59",IF([Patient Age]>=30,"30-44",IF([Patient Age]>=15,"15-29",IF([Patient Age]>=5,"05-14","0-4"))))))
```

DAX Formula For Patient Attend Status :

=IF([Patient Waittime]<30,"Within Time","Delay")

FINAL DASHBOARD

Hospital Emergency Room Dashboard Monthly Report

Dec

506	35.15		5.15	
No. of Patients	avg Patient wait time		Avg satisfaction score	
Admission Status	Patient	% Status		
Not Admitted	253	48.75%		4.
Admitted	266	51.25%		5
